5. CURRENCY PERIOD

This development approval will lapse at the end of the period set out in section 85(1)(a) of the *Planning Act 2016*.

6. ASSESSMENT MANAGER CONDITIONS

1.0 PARAMETERS OF APPROVAL

- 1.1 The Developer is responsible for ensuring compliance with this development approval and the conditions of the approval by an employee, agent, contractor or invitee of the Developer at all times unless otherwise stated.
- 1.2 Where these conditions refer to "Council" in relation to requiring Council to approve or be satisfied as to any matter, or conferring on the Council a function, power or discretion, that role of the Council may be fulfilled in whole or in part by a delegate appointed for that purpose by Council.
- 1.3 All conditions, works, or requirements of this development approval must be undertaken and completed prior to commencement of the use and to Council's satisfaction, unless otherwise stated in a development condition.
- 1.4 The cost of all works associated with the construction of the development including services, facilities and/or public utility alterations required are met at no cost to the Council or relevant utility provider, unless otherwise stated in a development condition.
- 1.5 The developer is required to have repaired any damage to existing infrastructure that may have occurred during any works carried out for the development. To the extent the damage is deemed to create a hazard to the community, it must be repaired immediately.
- 1.6 Unless otherwise stated, all works must be designed, constructed and maintained in accordance with the relevant Council policies, guidelines and standards.

2.0 APPROVED PLANS AND DOCUMENTS

- 2.1 The approved development must be completed and maintained generally in accordance with the approved plans and documents, except where amended by the conditions of this permit:

Plan/Document Name	Plan/Document Number	Date
Proposed Workshop (site plan)	-	July 2020
Steel Building by Longreach Bolted Sheds (elevations)	Sheet 8 of 8	7-7-2020

- 2.2 Where there is any conflict between the conditions of this approval and the details shown on the approved plans and documents, the conditions of approval must prevail.
- 2.3 An amended site plan must be submitted to Council for endorsement prior to, or with, the submission of a development application for building work, showing the location of:
 - 2.3.1 All car parking spaces;
 - 2.3.2 The vehicle access from Mulberry Street; and
 - 2.3.3 Landscaping areas, including between the shed and the street frontage.

3.0 ACCESS AND PARKING WORKS

- 3.1 Provide and maintain a minimum of five (5) car parking spaces on-site. A minimum of three (3) car parking spaces must be provided external to the shed. All car parking spaces must be clearly identified by either line-marking or signage.

***Advisory Note:** Tandem parking as shown on the site plan along the eastern boundary may not comply with other conditions under 3.0 Access and Parking Works. It is recommended that those car parking spaces external to the shed are located on the site in parallel (side by side, for example, 'nose-in' between the shed and Mulberry Street front property boundary) so all vehicles can easily enter and exit the site in forward gear. This may require the shed to be shifted towards the rear of the site.*

- 3.2 Construct and maintain all car parking spaces and vehicle manoeuvring areas to an all-weather standard, suitable for a two-wheel drive car.
- 3.3 Design, construct and maintain all car parking and access works generally in accordance with the Australian Standard AS2890.1 "Parking Facilities" and Austroads Publication AP-G34-13 – Austroads Design Vehicles and Turning Path Templates.
- 3.4 Construct and maintain a sealed vehicle access from Mulberry Street generally in accordance with the standard drawing, Figure 2 – Vehicle Crossover – Piped, from the General Development Code of the Blackall-Tambo Region Planning Scheme.
- 3.5 All vehicles must enter and exit the site in a forward gear.
- 3.6 All servicing, parking, loading and unloading of vehicles (including heavy vehicles) associated with the approved development must occur within the boundaries of the site and not on adjoining land or road reserve. This includes, but is not limited to, staff and customer vehicles and vehicles awaiting service and repair.

4.0 STORMWATER WORKS

- 4.1 All stormwater must drain to a lawful point of discharge, being the stormwater drain in Mulberry Street. All stormwater must not adversely affect adjoining land or infrastructure in comparison to the pre-development condition by way of blocking, altering or diverting existing stormwater runoff patterns or have the potential to cause damage to other infrastructure.
- 4.2 The vehicle access into the site from Mulberry Street must not interfere with the function and integrity of Council's stormwater drain in Mulberry Street.

5.0 ENVIRONMENTAL HEALTH

- 5.1 Undertake the approved development so there is no environmental nuisance or detrimental effect on any surrounding land uses and activities by reason of the emission of noise, dust, vibration, odour, fumes, smoke, vapour, steam, soot, wastewater, waste products, oil or otherwise.
- 5.2 Maintain outdoor lighting to comply with AS4282 Control of Obstructive Effects of Outdoor Lighting.

- 5.3 Site works must be constructed such that they do not, at any time, in any way restrict, impair or change the natural flow of runoff water, or cause a nuisance or worsening to adjoining properties or infrastructure.
- 5.4 In accordance with the Environmental Protection (Waste Management) Regulations, all waste storage areas must be kept in a clean, tidy condition, and sufficient waste containers and services are to be provided to cater for the containment and removal of all waste generated on the site. Waste must be removed to a lawful landfill.
- 5.5 Contaminants such as oils or chemicals must not be released into unsealed surface areas (i.e. gravel, exposed soil or landscaped areas).
- 5.6 Activities in the workshop and involving any washdown area must be undertaken on a sealed surface drained to an oil/water separator for treatment to the regulated standard before entering Council's sewer network.
- 5.7 Areas for storage of chemicals, fuel or other hazardous materials must be sufficiently bunded.
- 5.8 Any spillage of environmentally hazardous liquids or other materials must be cleared as quickly as practicable and must not enter Council's network or be hosed or swept onto unsealed ground.

6.0 SERVICES

- 6.1 The premises must be connected to Council's reticulated water and sewerage networks.
- 6.2 Electricity and telecommunication services must be provided to the premises in accordance with the standards and requirements of the relevant service provider.

7.0 LANDSCAPING AND FENCING

- 7.1 Establish and retain landscaping on the site with a cumulative area of at least 25m². Part of this landscaping area must be established at the front of the site between the shed frontage and the Mulberry Street frontage. The landscaping must predominantly contain species that are endemic to the region due to their low water dependency.
- 7.2 Ensure the landscaped areas are subject to water and maintenance during the establishment phase, and an ongoing maintenance and replanting programme as required.
- 7.3 Boundary fencing with a minimum height of 1.8 metres must be installed along each boundary of the property, except where allowance must be made for the vehicle access from Mulberry Street.

8.0 ASSET MANAGEMENT

- 8.1 Any alteration necessary to electricity, telephone, water mains, sewerage mains, and/or public utility installations resulting from the development or in connection with the development, must be undertaken and completed at no cost to Council.

9.0 CONSTRUCTION ACTIVITIES

- 9.1 Prior to construction of the vehicle access and water and sewer connections, forms for a Minor Works on Road Application and a Water/Sewer Connection Application must be completed and submitted to Council to notify the details of work being undertaken.
- 9.2 Implement and maintain an Erosion and Sediment Control Plan (ESCP) on-site, in accordance with the *IECA 2008 Best Practice Erosion and Sediment Control* document (as amended) for the duration of the works, and until such time all exposed soil areas are permanently stabilised. The ESCP must be available on-site for inspection by Council Officers during the works.
- 9.3 The construction of any works must be undertaken in accordance with good engineering practice and workmanship and generally in accordance with the provisions of any relevant standards under the *Blackall-Tambo Region Planning Scheme*.
- 9.4 All construction materials, waste, waste skips, machinery and contractors' vehicles must be located and stored or parked within the development site, unless otherwise approved in writing by Council.
- 9.5 Construction activity and noise must be limited to the hours of 06:30 to 18:30 Monday to Saturday, with no work to occur on Sundays or public holidays.

7. ADVISORY NOTES

- A. Prior to commencing any construction activities, the applicant/developer will be required to obtain further development permits for building work, and plumbing and drainage work, as required under relevant legislation for this work.
- B. This approval does not negate the requirement for compliance with all other relevant Local Laws and other statutory requirements. Any provisions contained in this approval
- C. relating to the enforcement of any of the conditions shall be in addition to all other rights, powers and privileges that the Council may possess or obtain, and nothing contained in these conditions shall be construed so as to prejudice, affect or otherwise derogate or limit these rights, powers and privileges of the Council.
- D. General environmental duty under the Environmental Protection Act 1994 and subordinate legislation prohibits unlawful environmental nuisance caused by noise, aerosols, particles, dust, ash, fumes, light, odour or smoke beyond the boundaries of the development site during all stages of the development including earthworks, construction and operation.
