Blackall – Tambo Region Planning Scheme

General Development Code - Planning Scheme Section 6.2.2

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
Site Layout				
PO1 The scale of new buildings and facilities suits its site and its surroundings.	New buildings cover less than the following percentage of site area: Township zone (where not in a precinct) - 50%; Township zone (Commercial precinct) - 90%; Township zone (Mixed Use precinct) - 50%; Township zone (Industrial precinct) - 40%; Recreation and Open Space zone – 10%; and Rural zone – no acceptable outcome prescribed.	The scale of new buildings and facilities exceeds what is intended for the site and surrounding area.	N/A	
Editor's note—The follomet.	owing animation is included to provide an illustrated indication of h			
	View animated code provision.			

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
PO2 Setbacks for buildings and structures for the front, side and rear are in keeping with other nearby buildings.	Setbacks are to meet the Building Code of Australia requirements (including any variations as per the Queensland Development Code). AO2.2 Setbacks are to allow for off street parking and vehicle movement, and in the Commercial precinct, off street parking is located at the rear of buildings to allow for easy vehicle movement and access.	Sometimes different setbacks are needed depending on the site layout or the type of new buildings proposed. It is important to make sure that reductions in setbacks don't impose on other properties, make it difficult for others to then use their properties, or go against what is common in the street/surrounding area.	Building or site layout that means others can't use their properties properly, or that means the streetscape would look substantially different if the proposed new buildings or facilities were approved.	N/A
Editor's note—The follo	wing animation is included to provide an illustrated indication of h			
	View animated code provision.			

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
PO3 Landscaping is provided to improve the presentation of the property – including, wherever possible, keeping existing trees that provide good shade.	AO3.1 Except in the Commercial precinct and the Rural zone, a minimum of 10% of the total area for new buildings and facilities is landscaped. AO3.2 In all areas, keep, or provide and maintain, shade trees and shrubs on the site – not just grass and shrubs.	Landscaping which doesn't improve the appeal of the surrounding streetscape and existing buildings – e.g. concrete dominating the site.	N/A	
Editor's note—The follo met.	wing animation is included to provide an illustrated indication of h			
Building Design				
PO4 Building height is similar to the other	AO4 New buildings are less than the following heights:	The height of a building can be		N/A

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
buildings in town and around the Blackall-Tambo Region.	 Township zone (other than in the Industrial precinct) 2 storeys or 8.5m above ground level; Township zone (Industrial precinct) – 15m above ground level; Rural zone – no acceptable outcome provided; and Recreation and Open Space zone – 8.5m above ground level. 	higher if it needs to be for a particular purpose – e.g. a church steeple, or a concrete batching plant.	Buildings higher than stated.	
Editor's note—The follomet.	wing animation is included to provide an illustrated indication of h			
PO5 New buildings have a similar look and feel to any surrounding buildings, and look like they belong in the local area.	In the Township zone (other than in the Commercial precinct, Industrial precinct and Mixed Use precinct), new buildings include at least 3 of the following: • verandas or porches; • awnings and shade structures; • variations to the roof and building lines; • recesses and projections of the external facade; • doors and window openings; • a range of building materials, colours and textures matching or complementing those prevailing in neighbouring buildings; or • windows or other design features which overlook the street to allow for passive surveillance.	Commercial and industrial buildings might need to look a certain way because of what they are used for (e.g. a service station, or a warehouse) – but buildings in these areas should still look and feel similar to other	Building designs which do not reflect the surrounding buildings, or contribute poorly to the streetscape.	N/A

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
Editor's noteThe follo	 AO5.2 In the Commercial precinct, new buildings will: provide for tenancies fronting the street provide an awning over the full length of the building frontage and setback a maximum of 0.25 metres from the kerb line at the ground storey, a minimum of 65% of building frontage is provided as predominantly transparent windows or glazed doors and a maximum of 35% as solid façade. Editor's note—Refer to PO25 related to retention/reuse of existing commercial buildings. 	buildings in the local area.	ome could be	
met.	View animated code provision.	·		
PO6 New buildings include design features which allow for passive surveillance of the streetscape and measures that				N/A

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
increase the safety of the neighbourhood. Dual Occupancy an	d Multiple Dwelling			
PO7 Dual occupancy and multiple dwellings are built to a high standard and look like they belong in the local area, by using similar design features and layout to other nearby buildings.	New buildings use high standards of design which reflects surrounding residential buildings. In particular, new buildings have at least one of these roof types with a pitch of 20 degrees or greater: • skillion • gable • hipped; or • pitched. AO7.2 Each dwelling includes the following design elements: • a visible entry (i.e. a front door) from the main street frontage • bathroom, laundry and toilet windows which are located to offer privacy from the street and other dwellings on the premises • privacy screening to adjacent neighbours, either through landscaping or screen structures • on-site parking provided at the side or rear of the site.	Sometimes newer buildings can look different to the surrounding area because of advances in architecture and building design. The design of new buildings should try as much as possible to complement the area they are located in.	Buildings that look like 'dongers' or trailer homes. Poor design and layout — e.g. poor positioning of car parks (stopping doors from opening fully or driveways leading onto intersections, or poor vehicle circulation designs.	N/A

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
			Poor and/or lack of privacy and shading.	
Additional uses on	the same site (Ancillary uses)			
PO8 In areas other than the Rural zone, additional buildings such as sheds, which support or do not dominate the purpose of the main building/s are reasonable in size and function.	AO8 In areas other than the Rural zone, ancillary buildings are not more than 10% of the floor area of the main building/s on the premises.	It is important that an additional building or use doesn't dominate the site it is on, or the purpose of the original building, useless it is supporting the function of the building/s.	Additional buildings with a gross floor area over 10% of the main building and do not support the use of the main building/s and streetscape.	N/A
Editor's note— Development on the same premises as an existing use that does not support that purpose, or dominates it, is considered a new use.		Additional uses on the same site in the Rural zone may be a material change of use.		

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
met.	wing animation is included to provide an illustrated indication of h			
Traffic, access, mar	noeuvring and parking			
PO9 Expected increases in traffic volume are properly managed and mitigated.	AO9.1 Local transport and traffic design standards/local laws are met. PO9.2 Development makes sure that: • local and residential roads are used only for local traffic; and • traffic or freight movement on local and residential roads is avoided.	Some uses may need to utilise local or residential roads for short or limited heavy vehicle movements, so actual impact will be a consideration in the assessment. Some uses may create a lot of new vehicle movements, and these will need to be analysed against traffic	Flows of heavy vehicle or significantly increased traffic along residential streets that could create unacceptable noise or inconvenience to residents, or impact on the condition of rural roads by heavy vehicles.	61 Rose Street offers several spots for parking on the property. Single Carport is located out the front of the premises along with access to park out the back of the property via May St back access, where 2-3 vehicles can park comfortably. There is also street parking that abide by local laws that won't interfere on passing traffic. 61 Rose Street is located in a low traffic area.

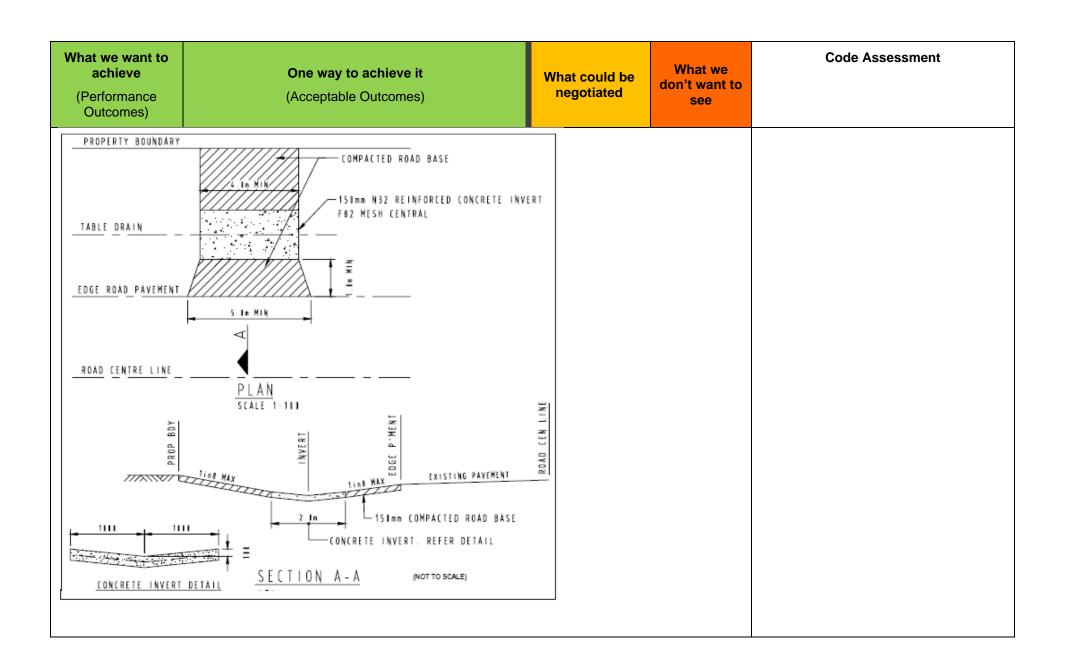

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
		standards as part of the assessment process.		
PO10 Sufficient parking spaces are provided for the use.	AO10.1 Car parking is provided as per the rates in Table 6.2.2.1. AO10.2 On-street parking is maintained.	If there is no building work (and it is just a change of use), reductions in onsite parking can be considered.	Poor or lack of onsite parking. Reductions in on-street parking, unless more is provided on site.	Sufficient onsite parking spaces for visitors – 2-3 vehicles if needed. Street parking is also an option that doesn't affect other property owners, nor does it affect passing traffic.

Table 6.2.2.1 Car parking requirements

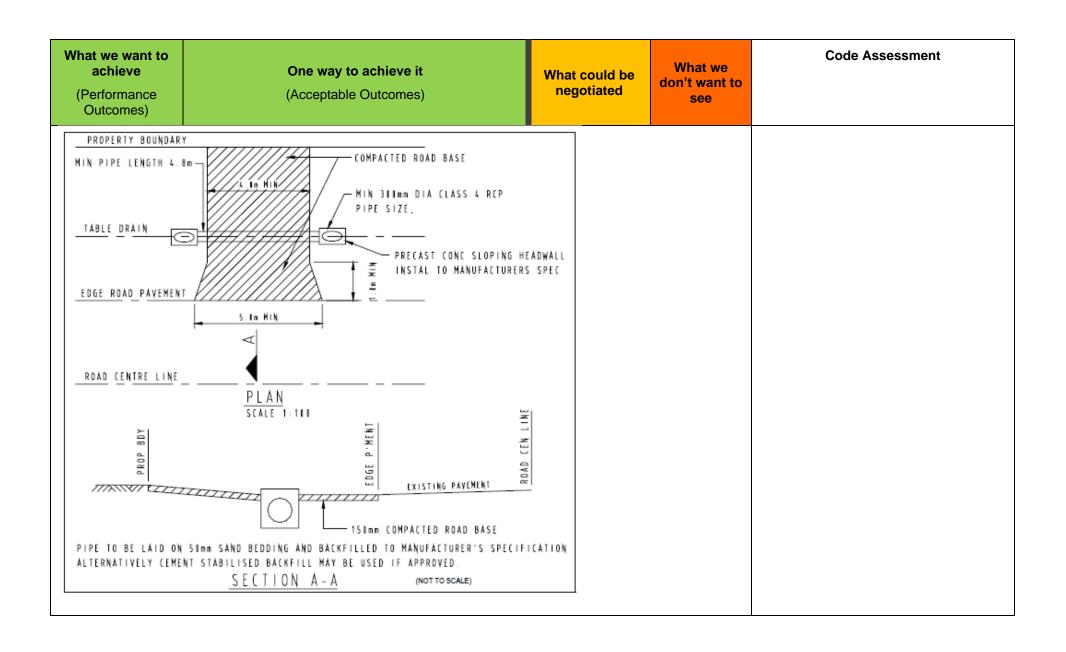

Use	Requirements
Childcare Centre	1 space for every employee, and 1 space for every 4 children.
Commercial activities	1 space per 50m2 of gross floor area.
Dual Occupancy	1 covered space for every 2 bedrooms, plus 1 space for every additional bedroom.
Dwelling house	1 covered space per dwelling.
Dwelling unit	1 covered space per dwelling unit.
Home-based business	1 space of additional parking to be provided for the dwelling.

What we want to achieve (Performance Outcomes)		One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
Industrial activities		1 space per 50m2 of gross floor area fo additional space per 100m2 of gross flo 1000m2.		d 1	
Multiple dwelling		1 covered space for every 2 bedrooms, additional bedroom.	plus 1 space for ever	Ту	
Non-resident workfo	orce	1 space per unit plus 1 visitor space per	every 5 units.		
Rural activities		1 space per 100m2 of gross floor area			
Service station		1 space per 30m2 site area.			
Short-term accomm	odation	1 covered space per guestroom or suite 30m2 of gross dining area, and 1 space		per	
Tourist park		1 space per site, plus 1 extra space for	every 3 sites.		
All other uses		Sufficient spaces to accommodate the a likely to be generated by the particular u		fic

Editor's note—The follobe met. Off-site impacts	wing animation is included to provide an illustrated indication of h	ow acceptable outcome	AO11.1 could	
PO12 Development avoids air, light and noise pollution which impacts the surrounding occupants, environment and streetscape.	Industrial and commercial activity adhere to air, light and noise pollution requirements. Editor's note—Reports prepared to justify compliance with AO12.1 should follow best practice, such as the guidelines in the Department of Environment and Science's Noise Measurement Manual, National Environment Protection (Ambient Air Quality) Measure (NEPC 1998), AS/NZS 1269 Set: Occupational Noise Management Set and Australian Standard 1055.2:1997 – Acoustics – Description and measurement of environment noise. AO12.2 New buildings and facilities include measures to reduce the impacts of air, light and noise pollution if situated along busy roads and/or near areas of industrial and/or commercial activity – such as sound dampening in walls, or acoustic barriers.	Depending on where new buildings or facilities are located, or what is actually proposed, these requirements might not be required. E.g. In a very remote area, noise might not be an issue.	New buildings or facilities that increase pre-existing levels of air, noise, or other pollutants in areas where other residents might be affected. New buildings situated along busy roads which do not minimise the impacts from air and noise	The nature of the development means the house is generally used as per normal use -short term accommodation/bed and breakfast, but not full time. Guest parking is always available on site. The short-term accommodation allows travelling people somewhere to stay in busy tourist seasons/local events and activities when capacities are stretched. Property is fully fenced & we have ensured property is equipped with mod cons and safety (such as smoke & carbon monoxide alarms, fire extinguishers, fire blankets etc.) Noise curfew will be in place and monitored — quiet hours are between 6pm-7am. Also, no events or parties that will disturb neighborhood are allowed on site.

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
			pollution caused by large amounts of traffic.	
Infrastructure and S	Services			
PO13 Suitable connections to power and telecommunications are provided.	AO13 Telecommunications and power supplies are designed to meet provider requirements.			Connection of power is as per normal residential requirements.
PO14 Adequate supply of potable water is provided to the premises, and new buildings are designed to be able to appropriately treat and dispose of	 AO14.1 In the Township zone, all new buildings are connected to Blackall-Tambo Regional Council's reticulated water supply network in accordance with: Water Services Association of Australia (WSAA), 2011, "WSA 03-11 Water Supply Code of Australia" Version 3.1; and 			Town water is connected from all outlets. Plumbing and sewage is in accordance with regulations.

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
effluent and other waste water.	 Queensland Department of Energy and Water Supply, 2010, Planning Guidelines for Water Supply and Sewerage. AO14.2 In the Recreation and Open Space zone and Rural 			
	AO14.3 In the Township zone, all new buildings and facilities are connected to a reticulated sewerage network, where available.			
	AO14.4 In the Recreation and Open Space zone and Rural zone, or in the Township zone where a reticulated sewerage network is not available, sewage disposal is provided generally in accordance with the Queensland Plumbing and Wastewater Code.			
PO15 Stormwater is collected and discharged to ensure no impacts on adjoining land, or Council or state infrastructure, while also ensuring environmental	 AO15 Stormwater drainage is provided in accordance with: Queensland urban drainage manual, 3rd Edition, Queensland Department of Energy and Water Supply, 2013; and Pilgrim, DH, (ed)., Australian Rainfall & Runoff – A Guide to Flood Estimation, Institution of Engineers, Australia, Barton, ACT, 1987. 			Land/property is not impacted by stormwater and poses no issues.

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
values of receiving waters are maintained. Council assets				
PO16	AO16.1			N/A
Council infrastructure is protected from encroachment or interference.	All building proposals are clear of Council easements and underground infrastructure within site boundaries. AO16.2 All invert crossing(s) and driveways are clear of all gully pits, street lights, power poles and other infrastructure located within the road reserve with a minimum separation distance of 1 metre.		New buildings that impact the function and use of Blackall-Tambo Regional Council assets.	
Development locate	ed in a Bushfire Prone Area			
PO17 Vulnerable uses, essential service uses and hazardous chemical facility uses are not established or intensified within a bushfire prone area.				N/A
PO18	AO18.1			N/A
Development in a bushfire prone	New buildings and facilities are not situated in a bushfire prone area as identified on SPP mapping —			

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
area, or intensification of existing uses in a bushfire prone area, is avoided, or, the risk to people and property from bushfire is mitigated to an acceptable or tolerable level.	Safety and Resilience to Hazards (Natural Hazards Risk and Resilience – Bushfire Prone Area) OR AO18.2 Development mitigates the risk to people and property from bushfire to an acceptable or tolerable level by: Incorporating an adequate bushfire defendable space between buildings and hazardous vegetation; and Providing safe evacuation routes for occupants and access for emergency services; and Providing a dedicated static water supply available for fire fighting; and Does not create additional bushfire risk through revegetation or landscaping.		New buildings in bushfire prone areas.	
PO19 Emergency services and community infrastructure continue to function effectively during and immediately after a bushfire event.	AO19.1 Emergency services and community infrastructure is not located in a bushfire prone area as identified on SPP mapping – Safety and Resilience to Hazards (Natural Hazards Risk and Resilience – Bushfire Prone Area).		Emergency services cannot function in or access the area, facility or building.	Access for emergency services is still able as per normal.
PO20	AO20.1			N/A

What we want to achieve (Performance Outcomes)	One way to achieve it (Acceptable Outcomes)	What could be negotiated	What we don't want to see	Code Assessment
Development avoids or mitigates the bushfire risk from manufacture or storage of hazardous materials within a bushfire prone area.	Hazardous materials are not stored or manufactured in a bushfire prone area as identified on SPP mapping — Safety and Resilience to Hazards (Natural Hazards Risk and Resilience — Bushfire Prone Area) OR AO20.2 Buildings and structures used for the manufacture or storage of hazardous materials are designed to prevent exposure of the hazardous materials in the event of a bushfire Editor's note—Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines; the Environmental Protection Act 1994; and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances. Information is provided by Business Queensland on the requirements for storing and transporting hazardous chemicals, available at www.business.qld.gov.au/running-business/protecting-business/risk-management/hazardous-chemicals/storing-transporting		New buildings or activities involving manufacture or storage of hazardous materials in bulk in a bushfire prone area.	
Development locate	ed in a Flood Hazard Area			
PO21 People and property are not exposed to	AO21.1 New development is: • situated outside of mapped flood areas identified in Schedule 2 – Flood mapping; or		Uses and activities that are incompatible	N/A
